#### **1.1.7. Assessment of research and development activity**

##### **Specification of the expenses in the financial year and those anticipated in the next financial year for research and development activity.**

The research expenses performed did not reached significant amounts and is not expected an increase for the next financial year. The result of the research expenses did not lead to register the research expenses.

#### **1.1.8. Assessment of the company activity regarding the risk management**

##### **Description of the company exposure to the price, credit, liquidity and cash flow risk.**

##### **Description of the company policies and objectives on the risk management.**

The activity of TMK-ARTROM S.A. in 2013 tried to reduce as much possible the company exposure on the market, credit, liquidity and treasury risk.

*The company was not exposed to internal risks:*

The risks related to supply and trade (agreements which could not be met by suppliers, narrowing the market) were reduced by the fact that the sole supplier of raw material is TMK-RESITA company within the group, and 80% of production is designated to export, 22% performed through companies within the group OAO TMK (related with the main shareholder TMK EUROPE ) and the rest directly to the customers which mainly were performed previous through traders which became trade agents TMK ITALIA and TMK EUROPE.

The company is exposed to the risk of credit from its operating activities ( primarily for trade receivables) and from its financing activities, including deposits in banks and financial institutions, exchange rate transactions and other financial instruments.

The credit risk of customers is managed under the established policies, procedures and control regarding to customers credit risk management.

Since 01.07.2011 was elected a Commercial Credit Committee and came into force the regulation , for a better coordination of financial discipline and for the safety of the company claims.

Provisions of that Regulation shall apply to sales made directly to third parties, internally but also externally for direct sales to customers (agent TMK ITALIA, agent TMK EUROPE) but also for direct sales in Eastern Europe.

The monitoring of the tracking activity of credit risk is made based on a set of rules and technical measures which classify and monitor the risk for each partner.

The company sell the goods to the external and domestic partners providing them depending on the each creditworthiness credit limits in amount calculated for periods between 30 and 90 days.

The credit limits granted are approved by the commercial credit Committee and are revised quarterly, but can be updated during the year when is necessary. Those are settled to minimize the risk concentration and to reduce, so, potential financial losses due to failure to pay by the partners.

In order to limit the credit risk, the company concluded on 1 October 2012 with COFACE S.A. an insurance contract default risk for almost the entire portfolio of sales to third parties by Coface SA.. In 2013 the company decided to maintain the insurance contract for the non-payment also with Coface but this time with the German subsidiary which could granted a smaller insurance premium in the same condition with the previous year. The credit limits granted by Coface covered to extern 70% from the required limits, and domestic market 51,5% from the required limits, so those customers which are not covered by Coface in percentage of 100% are closely monitored in order to limit the potential loss of uncollection.

Technological risks (unable acquisition of modern technology because of problems mainly related to finance investments) have not been completed because the company has major investments. For the next period the company has launched a new investment program designed to increase the added value of production and diversification level of service to customers.

In 2013, TMK-ARTROM not faced with these types of risk:

1. risks due to human factors (strikes, incompetent)
2. information risk (inability to keep pace with new market trends)

During 2013, TMK-ARTROM SA faced with external risks manifested by the business environment, determined by the effect of economic – financial crises and practising the dumping prices for steel pipes by China, Belarus, Ukraine.

In the case of TMK ARTROM, current and future cash receipts are not sufficient to alter the relationship between creditors and shareholders.

In order to protect against the risk of price TMK-ARTROM sets the selling price of products, from computers price through negotiation with business partners according to prices from retail markets in order to ensure breakeven.

At the beginning of the year there are concluded framework agreements for the sale of the export products with trade houses in the group.

End customers send orders through distribution channels, the order fulfillment time being of approximately 45 days for hot products and 60 days for the cold ones, and the price for each order is determined according to catalog prices on markets.

The sales analysis is always watching all value influences of quantity, structure and price. In relations with related companies TMK-ARTROM uses only market prices and controls the structure of the selling price up to the first unrelated client in the market, market fluctuations being reflected in the sale price to related companies.

Currency risk is the potential effect that changing exchange rates may have on the profit and loss account and on the balance sheet of SC TMK-ARTROM S.A.

Foreign exchange risk management has as its object and minimize losses that may arise from variations in exchange rates.

On short term, currency risk management aimed and still aims to maintain as cost elements which make the cost of operation made to avoid the loss to be less than the loss which could be produced without protection against the currency risk.

It was followed that the payments in a certain currency to be made from the collection in that currency, eliminating this way the cost of currency risk.

Currency auctions are negotiated with bank and here there are considered higher currency exchanges which benefit by better exchange rates.

On long term, it was aimed and aims that the protection expenses of the exchange rate to be less and to represent a lower share in total loss derived from currency risk.

TMK-Artrom concluded with BCR a framework contract "Master Agreement ISDA / 17.11.2011" through which runs forward transactions but also other transactions with BCR up to 3.000.000 EURO treasury line.

The company concluded in 2013 contracts on derivate operations on exchange rate transactions which were treated under IFRS as hedging operations

In Master Agreement were signed the following agreements for FORWARD transactions:

- In April 2013 were concluded 3 agreements of 500.000 euro each, on variable exchange rate as follows:
  - For transaction with maturity in May 2013 4,4313 EUR/RON;

The main production capacities of SC TMK-ARTROM Slatina are:

- Workshop no 1 ASSEL: Hot rolling and finishing line for hot rolled pipe with heavy wallthickness in range of 60-224 mm , ASSEL type (120,000 tons / year) composed by several stands in line.
- Workshop no 2 CPE: The rolling and finishing CPE (Cross Piercing Elongator) with a capacity of 100,000 tons / year. The line was commissioned on December 31, 2006, at first with only 80% of its capacity. In 2007 we continued the investment process so that the mill's production capacity reached 100,000 tons. It produced pipes in the range of 12,5 -114,3 mm.
- Workshop no 3 for cold drawnd/rolled pipes is composed mainly of a series of cold rolling mills: LAPIR Pilger mill type 50, 75, SKW 75 automatic Pilger mill and Pilger mill HPT 250 and drawing benches 15 tj, 30 tf,

Cod: FCU-01, Ed.2 Rev. 9/2013

45 tf, 50 tf, 150 tf. Also, the department is equipped with pipe finishing and delivery machines. It has a production capacity of 28,000 tons / year and can provide cold processing of pipes with diameters between 17 and 220 mm for the construction and manufacture of bearings

The location of these capabilities is on the land in the ownership of SC TMK-ARTROM Slatina, Street Draganesti km. 30, Olt County.

The company also has in Slatina, street Ec.Teodoroiu, two secondary offices at the ground floor of blocks V22 and V23.

## **2.2. Description and analysis of the wear degree of properties of the company**

The theoretical wear is generally low because times of life have changed for older machines the term of which would have expired on 31.12.2004 if the physical term of functioning and production of future income can be extended by 20-30 years. There are also new assets of Mannesman import.

The capacity situation is as follows:

- The hot rolling line is in good technical condition. There have been made investments for the modernization and automation of control systems and automatic operation of the mills in the hot rolling line and investments in the finishing flow of the final product (marking, coating, packaging) that have led to reductions in energy costs and the costs of finishing materials.
- The capacity rolling and cold drawing is in good condition, mills and benches operating at design capacity in terms of finite dimensional pipes according to technical documentation. The capacity is composed of both machines produced in Romania before 1989, and imported equipment commissioned in 1992, 2001 and 2007.
- The new production capacity, respectively the CPE mill. The mill is a German manufacturer (Mannesmann Demag Meer) and is the youngest of the new generation of economical rolling mill.

In 2013 the current repairs were made to the technological development of the designed parameters, and repairs to equipment and buildings which have been recognized in the carrying amount of tangible assets amounting to 14.102.560 lei.

### **Corporate governance.**

#### **a) on the corporate governance code which the company voluntarily decided to apply**

The company management ensures compliance in the Corporate Governance Code voluntarily applied by the company with the principles contained in the Company's Corporate Governance Code of BSE.

Since 1 March 2006 TMK-ARTROM S.A. is part of the TMK Group (OAO TMK) and it is controlled by the German company TMK-EUROPE which has itself as sole shareholder the Russian company OAO TMK.

However, TMK-ARTROM is managed and run as an independent company complying with the legislation relating to the local capital markets and the equally protection of interest to each shareholder

Of the same group of companies is part TMK-RESITA as well, but according to the Order of Ministry of Finance no. 2001/2012 statements should not be consolidated.

In Romania TMK-ARTROM is related to TMK-RESITA which is controlled by the same shareholder. There are not reported consolidated financial statements for the two companies, since they do not comply with the provisions of the law regarding the consolidated financial reporting requirement.

TMK-ARTROM constantly strives to ensure that its activities are consistent with global standards of openness and financial transparency.

This approach improves the Company's credibility in the eyes of investors, partners and state authorities. The corporate governance of TMK-ARTROM evolved positively over time and it is in a continuous process of modernization in accordance with international standards.

Corporate governance is based on legitimate rights and interests of shareholders. It encourages effectively corporate activities, including increases in the value of company assets, create jobs and support profitability and financial stability of the Company.

The corporate governance principles applied in the company are publicly available and can be obtained on the company website [www.tmk-artrom.ro](http://www.tmk-artrom.ro).

**c) a description of the main characteristics of internal control and risk management systems in relation to the financial reporting process;**

The company's management is controlled by shareholders and the financial auditor, according to legal regulations valid in Romania.

The Internal Audit Service of TMK-ARTROM, was transformed since July 2013 in the Department of Internal Audit and Risk Analysis, it reports to the Chief Executive Officer of TMK-Artrom SA and work to assess, in a systematic and methodical approach, existing processes of internal control, risk management and corporate governance. To ensure an effective system of risk management and compliance (compliance) with international regulations in force, since July 2013 was also set up the Compliance Risk Management Committee (Compliance Risk Management Committee) to coordinates all these activities.

In December 2013 we started working with Marsh Insurance Reinsurance Broker from Romania through which will be achieved:

1. Audit risk and build a report through which highlight the major risks facing the company and risk mitigation measures;
2. Identify transferable to insurance risks;
3. Request solutions in the market insurers, negotiating offers, presenting a comparative report options available for TMK ARTROM;
4. Administration insurance program (notifications, terminations, renewals);
5. Assistance in case of damage and assist in the recovery of damages and consultant on every event.
6. Regular reporting and information regarding the insurance market changes from Romania and not only.

Internal audit is carried out under the provisions of the Article 20 of the Ordinance no.75/1999 on financial audit aimed objective examination of the whole economic activity of the entity in order to provide an independent evaluation of risk management, control and management of its processes.

Internal audit objectives agreed with the company's management and Audit Committee of the Council's administration according to the law in force, are:

- a) verifying the compliance of activities from the entity being audited with policies, programs and its management, in accordance with legal provisions;
- b) assessing the adequacy and application of financial and non-financial controls arranged and conducted by management in order to increase the efficiency of the economic entity;
- c) assessing the appropriateness of the data / information management for financial and non-financial entity knowledge from economic reality;
- d) protecting property and off balance sheet items and identifying methods to prevent fraud and losses of any kind.

In accordance with the Accounting Law no 82/1991 and OMFP no. 522 dated 16 April 2003 (updated) for the approval of the General Methodological Norms regarding the exercise of preventive financial control, the preventive financial control decision no. 325 of 11.08.2011 has been updated, by which the organization and exercise the preventive financial control in the company was regulated.i.

In the field of Environmental Quality Management there are internal audit procedures that verify compliance at the company level with requirements of reference standards ISO 9001, API Q1 and ISO 14001 and its documents, the way in which they are implemented and effectively maintained.

Annually there is also performed the control of the assets by conducting an annual inventory based on the decision of the company management and the decision to establish a program of annual inventory.

Financial reports prepared in compliance with national legislation are audited by Ernst & Young as well as annual reports and financial statements prepared in order to consolidate financial statements at the level of the TMK Moscow group.

Compared to 2012, due to increase of physical production by 1.8%, operating expenses increased in total by 2.7%, registering these variations in operating cost categories:

- Raw materials and consumables decreased by 5,6% mainly due to decrease in price for raw materials (billets) with 10%, and increase in effective consumption of billets with 2% for rolled production
- Energy costs, natural gas and water decreased by 5.6% due to lower specific physical consumption and decrease in purchasing price of natural gas. The average price of natural gas fell by 9.2% and for electricity the price increased by 4% compared to the previous period.
- Personnel expenses recorded an increase of 8.7% compared with 2012. The average salary of 2013 compared to 2012 increased by updating the wages on half year basis with inflation index under the collective labour agreement concluded at company level, but also due to the increase of wages negotiated under collective labour agreement. The effective number of employees as at 31.12.2013 was 1227 persons compared with 1207 persons as at 31.12.2012. The average number of personnel in 2013 was 1216 people compared with 1183 in 2012.

- Expenses with sold goods (commercial activity) increased by 219% due to export sales and domestic market of 37 380 tons of profiles (billets) purchased from companies within the group (TMK-RESITA and Trade House TMK).

The Company recorded losses of financial activity in the amount of 15.907.062 lei due to interest expenses and exchange rate differences.

Compared with 2012, the financial loss of 2013 decreased by 14.3%. Interest expenses decreased by 8.4% due to lower interest rates and loan repayments made under the repayment schedules.

According to the OMPF 1286/2012, with subsequent amendments, the monthly closing balances in foreign currency to cash & bank accounts, receivables and liabilities accounts (monetary items) were revaluated to the reference rates of National Bank of Romania.

The instability of the national currency and a sharp depreciation of the leu / EUR and leu / USD, which has evolved from 4,2848 lei/EUR as at 31.12.2010, to 4,3197 lei/EUR as at 31.12.2011, to 4,4287 lei/EUR as at 31.12.2012 to 4,4847 lei/EUR as at 31.12.2013 respectively from 3,2045 lei/USD (31.12.2010), to 3,3393 lei/USD (31.12.2011), to 3,3575 lei/USD (31.12.2012) and to 3,2551 lei/USD (31.12.2013), led to record earnings from exchange rate differences in the amount of 1.035.181 lei in 2011, in 2012 the exchange rate losses in the amount of 6.634.805 lei and in 2013 the exchange rate losses in the amount of 3.866.984 lei.

The Company calculated deferred tax arising from temporary differences calculated for different assets and other items. Thus as at 1.01.2011 was recognized in retained earnings a net debt of 26.594.500 lei. In 2011 were recorded deferred tax expense in the amount of 39.728.503 lei and deferred tax income in the amount of 27.360.287 lei, in 2012 deferred tax income in the amount of 4.605.637 lei deferred tax expense in the amount of 8.546.945 lei and in 2013 deferred tax income in the amount of 4.100.101 lei and deferred tax expense in the amount of 531.704 lei. Current income tax expense in 2013 is 4.870.741 lei.

Net cash from operating activities decreased in 2013 against the previous period due to increased payments to suppliers and advances to TMK Resita SA as well as increased turnover in the 4th quarter of 2013 compared to the same quarter of 2012.

Net Cash from operating activities increased in 2012 compared to the previous period as a result of executing payments made to TMK RESITA for the acquisition of profiles intended to be sold on export.

Net Cash from investing activities decreased in 2013 compared to 2012 due to increased payments for acquisition of property and equipment primarily for new equipment for non-destructive testing of pipes, the

pipes capacity cutback in fixed lengths as well as advances for equipment in order to equipment of a new production section "Section no.4 pipes hydraulic cylinders."

Net cash from investing activities increased in 2012 compared to 2011 due to reimbursement of the loan by TMK Resita SA.

Net Cash from financing activities increased in 2013 compared to 2012 due to increased use of overdraft credit line BCR from 5.970.794 euro as at 31.12.2012 to 18.899.816 euro as at 31.12.2013 and of 1,7 mln euro granted by Unicredit Tiriatic Bank to finance current needs.

In November 2013 was early repaid the balance of the loan contracted to VTB Bank Austria of 14,1 mln euro through the refinancing from Unicredit Tiriatic Bank to reduce financing costs (was achieved a reduction of fixed interest margin from 4% to 1,9%).

Net cash from financing activities decreased in 2012 compared to 2011 due to the use of overdraft credit line from BCR to 5.9 million euros compared with 14.7 million euros of year 2011.

Net cash from financing activities improved in 2011 compared to 2010 due to the restructuring of the loan portfolio. In 2011 IPSCO Tubulars loan was repaid in the amount of 79 million U.S. dollars by contracting three long-term loans in euros respectively: 20.000.000 Eur from VTB Bank Austria, 20.000.000 Euro from BCR and 15.000.000 euros from Unicredit Tiriatic Bank. Overdraft line of credit from BCR was increased to 20 million euros and valid three years and the balance is used at the end of 14.735.337 euros lower than previous periods.

## 1. Liquidity indicators

**Current ratio (capital)** and **Quick Ratio (acid test)** express how many times current liabilities are included in current assets, respectively in current assets less inventories.

The recommended values are around 2, reflecting the company's capacity to cover the current liabilities from current assets, and mainly from receivables and cash. The values obtained in 2013 are lower than those recommended and from the previous year due to increased current liabilities arising from transfer of long-term bank loans in the short term.

## 2. Risk indicators

**Gearing indicator of equity** express whenever they include borrowed capital (long term liabilities) in equity and reflect the financing structure of the company at the end of the year. This indicator has improved due to lower long-term bank loans by transferring them in the short term and reimbursements made.

**Interest cover indicator** determine how many times the company may pay interest expense.

Compared to previous years, this indicator has decreased due to lower accounting profit and due to lower interest volume.

### 3. Activity indicators

**Number of days of storage Numarul de zile de stocare** indicates the number of days in which goods are stored in the unit. This indicator increased in 2013 compared to previous years consistent with lower rotation speed stock (inventory turnover)

**Turnover of debtors, clients (Receivables Collection Period)** express the number of days until the debtors pay their debts to the company and show the efficacy of the company in collecting its receivables. This indicator increased in 2013 compared to 2012 due to increased turnover and in the 4th quarter of 2013 compared to the same quarter of 2012, which led to an increase in the average balance of trade receivables.

**Speed of-vendor payables (Payables Period)** expresses the number of days of credit which the company obtains from its suppliers.

This indicator is less than the speed of rotation of the customers, due share of purchases of raw material (billets) from the sole supplier TMK-RESITA for which the payments are made in advance.

**Rotation speed of fixed assets** evaluates the effectiveness of fixed assets management by examining the value of turnover generated by their operation.

This indicator increased in 2012 compared to 2011 due to increased turnover, and decreased in 2013 compared to 2012 due to lower turnover.

**Rotation speed of total assets (Assets Turnover)** evaluates the effectiveness of the total assets management by examining the turnover generated by the assets of the company. In 2012 this indicator increased due to increased turnover in 2013, registering a slight decrease from the previous year.

### 4. Profitability indicators

**Return on equity (ROCE)** represent the profit which the company obtain on a unit of resources invested.

This indicator decreased in 2013, mainly due to the decrease in operating profit which covered the financial loss.

**Gross margin on sales (Gross Profit Margin)** is lower in 2013 than in previous years due to lower average selling prices of products sold.

The obligations under the law on the organization and management of accurate and up to date accounting and accounting principles have been fulfilled

Balance sheet, profit and loss account and the accompanying financial statements were prepared by taking proper synthetic and analytical accounts in the trial balance.

The accounting records are organized on double entry by the Master-Chess method by automatic processing of data, quantity and value.

In early 2008, the information system and applications based on FoxPro 2.6 have been fully migrated to SQL Server platform, and the connections between the management and the manufacturing / billing module was performed during 2008.

The Financial-Accounting subsystem, part of the Management Information System of SC TMK-ARTROM, consists of programs and procedures specific to this activity, forming the applications prepared for the current operation. Applications are written in a client-server configuration with database managed by a Microsoft SQL 2000 server. Client applications are written in Microsoft Access or C # and are managed and distributed centrally from a file server.

The Accounting and Finance departments operated these applications based on personal access accounts to each user. Modules have been merged, meaning that many existing programs in FoxPro have been included in a single SQL mode. For this reason, users access information is more quickly, requiring fewer trips from the application to start a new application.

The access rights to databases are set at the server level and are organized into groups (roles) that include individual users. In this way, moving a user from one group to another means automatically the re-allocation of access rights. The maintenance and development of databases and client programs are performed by the company's IT department. The database is archived automatically every 6 hours, thus backing up or creating comparative elements if necessary.

Relationships between database entities are set at the server level, applying the concept of referential integrity. In this way there are insured both data consistency, and the impossibility of accidental deletion of information, if any records remained uncorrelated

The database type is OLAP (online analytical processing), providing real-time data to all departments. The system has an architecture that does not require data transfer or archiving by eliminating records, which provide faster access to historical data.

The IT system supports an unlimited number of users and is accessible to authorized users via the Internet, based on the access way to server via TCP / IP.

The security and integrity of the database is done from the convenience of SQL Server (roles, users, triggers). In 2009 we migrated from SQL Server 2000 to SQL Server 2005 and workstations were integrated into Active Directory, allowing the centralized management of access to accounts. The automatic reporting module of production and delivery was developed.

In 2011 the IT department team developed several new applications in accordance with the requirements of top management:

- The external application Car Ramp was replaced by the software Car Tickets, written by the programmers of IT department. It is integrated into the computer system of TMK and takes the amount directly from the truck scales, thus avoiding typing mistakes.

- The automated reporting module was completed with the report of irregularities and the report of orders.

- The labeling of products changed, showing on the label the bar code that identifies each package

- The application 'package' was upgraded and allows taking amounts automatically from electronic scales from producing departments and allocating these amounts to the bar codes on packages.

- there was installed a SharePoint type collaborative platform for secure sharing of documents and information between authorized users.

- The company intranet was completed with sections containing documentation applications, AQ working procedures, technical standards, practical Excel courses, etc.

In Payables module was implemented (payments to suppliers) as transmitted automatically report server database to users. Also, was implemented an application for managing Suppliers from Approved Providers list(LFA).

The IT department was aligned to the dynamic evolution of programming environments and to top network equipment, cutting edge software and hardware.

The existing software has been modified at request in accordance with the requirements of services involved in their use to serve more efficiently their purpose.

Regarding systems, there was continued the acquisition of new computers so as to replace old ones at the moment there being a computer network capable of running without problem existing applications as well as the company ERP.

Starting October 2007, TMK-ARTROM has been using for the calculation of salaries and personnel records the application WIZSALARY contracted from the company WIZSALARY SOFTWARE SRL Bucharest.

Starting January 2011, TMK-ARTROM has been using for general accountancy the application WIZCOUNT contracted from the company WIZROM SOFTWARE SRL Bucharest for the preparation of trial balance, the log register, the chess sheets and account records.
